About me: I've started learning web development 8 months ago. In the beginning I was really afraid of failure but I've encouraged myself and now I can say that my skills are really improved because I did a lot of projects and finished 3 big courses on udemy. Along this courses I learned about HTML, CSS, JavaScript, MongoDB, React, Sass, Bootstrap and lots of other great stuff and now it's the time for me to get hired as a junior developer.
